

THERE FOR THE UNEXPECTED

Tanasbourne Veterinary Emergency provides care for patients in Washington County and surrounding areas during evening, weekend and holiday hours. Our goal is to be there to treat emergency issues as they arise during the hours when your family veterinarian is not available. We will work with your daytime vet to provide comprehensive around the clock care. We offer a complete in-house laboratory, as well as digital radiographs, endoscopy, and an ultrasound machine to help us determine the severity of emergent issues.
